

Sameer Gautam

Product Designer

Augsburg, Germany

+49 176 31427148 | hi@withsameer.design | withsameer.design ↗ | LinkedIn ↗

PROFILE

Product Designer specialising in enterprise workflow systems and multi-stakeholder platforms — approval workflows, cross-functional knowledge platforms, and internal tooling for engineering organisations across Germany and Asia. Always from the system, not the screen.

Leverages AI and agentic workflows as thinking partners to accelerate research, hypothesis generation, structured reasoning, and solution exploration.

EXPERIENCE

Infineon Technologies

03/2025 – 03/2026

UX Design & Research — Working Student

Collaboration Feature — Gemini (Digital Twin Platform)

- Identified a collaboration gap in the schematic editing module, proposed contextual commenting, tagging, snap-to-grid, and marquee selection — secured sprint prioritisation and shipped within the same engagement.
- Interviewed Chinese and Japanese FAEs; synthesised insights in Dovetail to inform feature decisions.

Short Flow Workflow — Gemini (Digital Twin Platform)

- Designed the Short Flow approval lifecycle — translating requirement-to-feasibility processes across four engineering roles into an eight-stage workflow with role-specific permissions and status visibility.
- Scoped against FAE demands for auto-layout, live simulation, and in-platform video calls — prioritising structured feedback and status visibility as the highest-value solution given technical and delivery constraints.
- Replaced email-based tracking for 50+ FAEs — eliminating manual follow-up across six workflow stages with real-time visibility at each review gate.

Rohde & Schwarz

10/2023 – 12/2024

UX Design & Research — Working Student

Engineering Change Request Application — Quality Gate Review Process

- Made the case to engineering leadership for modernising a 15-year-old internal tool — redesigned end-to-end submission and approval tracking used by hundreds of engineers across the quality-gate review process.
- Interviewed engineers, product managers, engineering leads, and directors — spanning request creators through final approvers — to map the end-to-end customisation workflow.
- Introduced structured status visibility and feedback loops for approval, rejection, and resubmission — replacing email-based follow-up across all review stages.

PLM Collaboration Space — Workspace Platform

- Designed and launched a cross-functional knowledge platform adopted by 2,000+ employees across eight PLM domains — end-to-end from discovery through rollout.
- Established an ownership and publishing framework that sustained platform activity post-launch — without ongoing design involvement.

Healthifyme

08/2021 – 01/2023

Product Designer

Unified Client Health Overview

- Designed a unified coaching dashboard aggregating CGM, nutrition, and activity data for 100,000+ users — reducing cognitive load for trainers managing multiple clients and enabling pattern-based decisions.

Trainer Workflow Optimisation

- Redesigned dashboard information hierarchy to surface priority signals first — validated with 20 trainers, cutting average client review time from 2 minutes to under 30 seconds.

Health Trend Insights

- Designed health trend views connecting CGM, nutrition, and activity data — adopted as the primary coaching reference post-launch.

EDUCATION

Masters in Interactive Media Systems	03/2023 – 03/2026
<i>Technical University of Applied Sciences Augsburg</i>	
Core Courses: UX Research, HCI, Mixed Reality (AR/VR), Agile Methodologies, Entrepreneurship, AI & Ethics	
Bachelor of Technology in Information Technology	08/2010 – 07/2014
<i>Manav Rachna College of Engineering, India</i>	

CERTIFICATIONS

- Google — Foundations of UX Design

TOOLS & SKILLS

Design	Figma, FigJam, Adobe Creative Cloud, Framer
UX Methods	User Interviews, Stakeholder Interviews, Affinity Mapping, Information Architecture, User Flows, Journey Mapping, Usability Testing, A/B Testing
Research & Validation	Maze, Dovetail
Analytics	Google Analytics (GA4)
Collaboration	Miro, Jira, Confluence
AI Tools	ChatGPT, Claude, Gemini, Claude Code, Codex, NotebookLM, Figma Make
AI Capabilities	AI-Assisted Problem Solving, Research & Synthesis, Human-AI Collaboration, Structured Communication, Hypothesis-Driven Exploration, Agentic Workflows
