PROFILE

Analytical Product Designer with 10+ years across digital products — engineering, customer research, and business — specialising in enterprise UX for complex workflows. At Infineon and Rohde & Schwarz, designed multi-stakeholder systems including an approval platform for 50+ field engineers and a knowledge platform connecting 2,000+ employees across a global organisation. Always from the system, not the screen.

Works AI-natively: uses LLMs and agentic workflows daily across research synthesis, prototyping, and design-to-code — treating AI as core tooling, not an add-on.

EXPERIENCE

Infineon Technologies

03/2025 – 03/2026

UX Design & Research (Working Student)

Collaboration Feature — Gemini (Digital Twin Platform)

- Identified a collaboration gap in the schematic editing module, proposed contextual commenting, tagging, snap-to-grid, and marquee selection — secured sprint prioritisation and shipped within the same engagement.
- Interviewed Chinese and Japanese FAEs; synthesised insights in Dovetail to inform feature decisions.

Short Flow Workflow — Gemini (Digital Twin Platform)

- Designed the Short Flow approval lifecycle — translating requirement-to-feasibility processes across four engineering roles into an eight-stage workflow with role-specific permissions and status visibility.
- Scoped against FAE demands for auto-layout, live simulation, and in-platform video calls — prioritising structured feedback and status visibility as the highest-value solution given technical and delivery constraints.
- Replaced email-based tracking for 50+ FAEs — eliminating manual follow-up across six workflow stages with real-time visibility at each review gate.

Rohde & Schwarz

10/2023 – 12/2024

UX Design & Research (Working Student)

Engineering Change Request Application — Quality Gate Review Process

- Made the case to engineering leadership for modernising a 15-year-old internal tool — redesigned end-to-end submission and approval tracking used by hundreds of engineers across the quality-gate review process.
- Conducted quantitative and qualitative research across engineers, product managers, engineering leads, and directors — spanning request creators through final approvers — to map the end-to-end customisation workflow.
- Introduced structured status visibility and feedback loops for approval, rejection, and resubmission — integrating accessibility standards and replacing email-based follow-up across all review stages.

PLM Collaboration Space — Workspace Platform

- Designed and launched a cross-functional knowledge platform adopted by 2,000+ employees across eight PLM domains — end-to-end from discovery through rollout.
- Established an ownership and publishing framework that sustained platform activity post-launch — without ongoing design involvement.

HealthifyMe

08/2021 – 01/2023

Product Consultant

Consultative Sales & Customer Discovery

- Consulted and converted thousands of prospective customers across US, UK, AU, SG, and CA markets — developing firsthand insight into customer psychology, objection patterns, conversion journeys, and the gap between expectations and long-term satisfaction.

Insight-to-Product Translation

- Identified recurring pain points and expectation gaps from frontline conversations, feeding findings into product and service improvements through user testing and dashboard feedback sessions.

Dashboard Optimisation Research

- Participated in user testing for internal coaching dashboards — contributing frontline customer insight that informed information hierarchy and workflow decisions.

EARLIER EXPERIENCE

- Business Development & Digital Marketing Consultant**

01/2019 – 08/2021

Independent Consultant — Real Estate Sector, Gurugram, India

 - Partnered with real estate developers on digital marketing, website development, lead generation, and sales funnels — first-hand experience in customer journeys, conversion, and digital touchpoints.
- Product Design & Business Development Consultant**

07/2016 – 01/2019

Independent Consultant — Manufacturing, Faridabad, India

 - Worked across the full product lifecycle in a manufacturing business — mechanical product design (SOLIDWORKS, AutoCAD), quality inspection, testing, and customer requirements — where engineering met business.
- Customer Experience (CX) Service Executive**

05/2015 – 07/2016

BT Group, Gurugram, India

 - Technical support for UK consumer broadband — root-cause analysis, structured troubleshooting, and translating technical complexity into clear customer communication.
- Customer Experience (CX) Service Executive — Electronic Arts Account**

08/2014 – 05/2015

iEnergizer, Noida, India

 - Player support, game testing, and issue investigation for a global user base — foundation in user empathy and translating feedback into product improvements.

EDUCATION

- Masters in Interactive Media Systems**

03/2023 – 03/2026

Technical University of Applied Sciences Augsburg

Core Courses: UX Research, HCI, Mixed Reality (AR/VR), Agile Methodologies, Entrepreneurship, AI & Ethics

Certification: Google — Foundations of UX Design (2022)
- Bachelor of Technology in Information Technology**

08/2010 – 07/2014

Manav Rachna College of Engineering, India

SELECTED INDEPENDENT WORK

- Portfolio System — AI-Assisted Next.js Build**

2026

 - Designed and built portfolio from scratch as a Next.js project with custom vector design, interaction detail, product storytelling, and AI-assisted development workflows using Claude Code, Codex, Cursor, and VS Code.
 - Used multi-agent comparison, sub-research, and structured reasoning to explore implementation options, surface weak assumptions, debug, refine UI behaviour, and improve solution quality.

TOOLS & SKILLS

Design	Figma, FigJam, Adobe Creative Cloud, Framer
UX Methods	User Interviews, Stakeholder Interviews, Customer Journey Mapping, Affinity Mapping, Information Architecture, User Flows, Usability Testing, A/B Testing, Accessibility Best Practices
Research & Validation	Maze, Dovetail, Google Analytics (GA4)
Collaboration	Miro, Jira, Confluence
AI Tools	ChatGPT, Claude, Gemini, Claude Code, Codex, NotebookLM, Figma Make
AI Capabilities	AI-Assisted Problem Solving, Research & Synthesis, Human-AI Collaboration, Structured Communication, Hypothesis-Driven Exploration, Agentic Workflows

LANGUAGES

- English — C1
- German — A2, B1 in progress
